*Design your dream life on a dime*

# Nursery Part 1

Visually interesting accent wall behind crib in subtle, yet impactful design.

Floor lamp w/ dimmer will let you control the light during late night feedings.

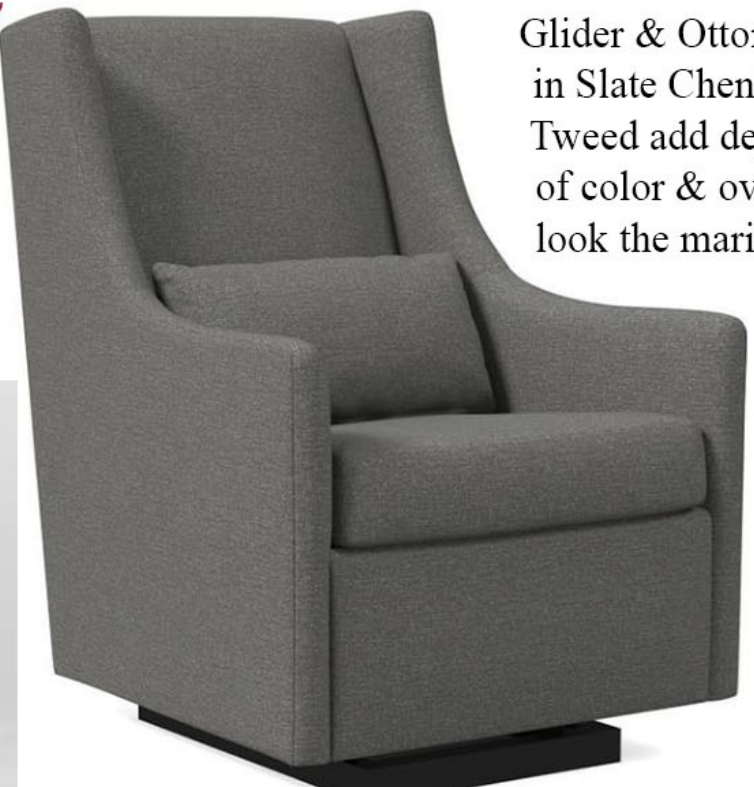

Crisp, white curtains with gold hardware soften the space.

Modern white crib with gold foot accent ties into the other gold accents throughout room.

Faux-Olive Tree in wicker basket add natural touch & color to the space.

Glider & Ottoman in Slate Chenille Tweed add depth of color & overlook the marina.

Fun storage baskets & crib sheet compliment wallpaper.

Super soft sheepskin rug layers over carpet to add texture and comfort.

A soft and neutral nursery was going to be perfect for the client's new baby girl. By incorporating various textures and patterns like the lush faux sheepskin rug, a checkered crib sheet, white linen drapery, and grayscale peony wallpaper, I was able to cultivate visual interest and dimension in the space.

We played around with the placement of the faux-eucalyptus tree, as it was one of the most visually compelling elements of the nursery. Ultimately, we landed on the globe lamp, as this would be a wonderful feeding corner with the custom glider and ottoman.

Faux-Eucalyptus Hack

## Nursery Part 2

'Bunny' art prints give a nod to the 'theme' and wonderfully tie in the colors of the room.

Acrylic & gold diaper caddy sits atop the dresser, with a glass lamp & a quartz salt lamp, which will provide dim lighting for naptime.

Bedside table lamp complements the floor lamp, with 'Giraffe' art print hanging above nightstand.

New mother-of-pearl knobs instantly customize dresser.

Stacked white picture ledges make a 'book wall' art installation.

Classic design of single bed feels modern and sophisticated.

Hot Rolled Steel dark grey nightstand compliments the color of the glider and is great for additional storage with wicker basket underneath.

Complimentary patterns in the bedding include grey, white, and tan, bringing visual interest without competing with the rest of the space.

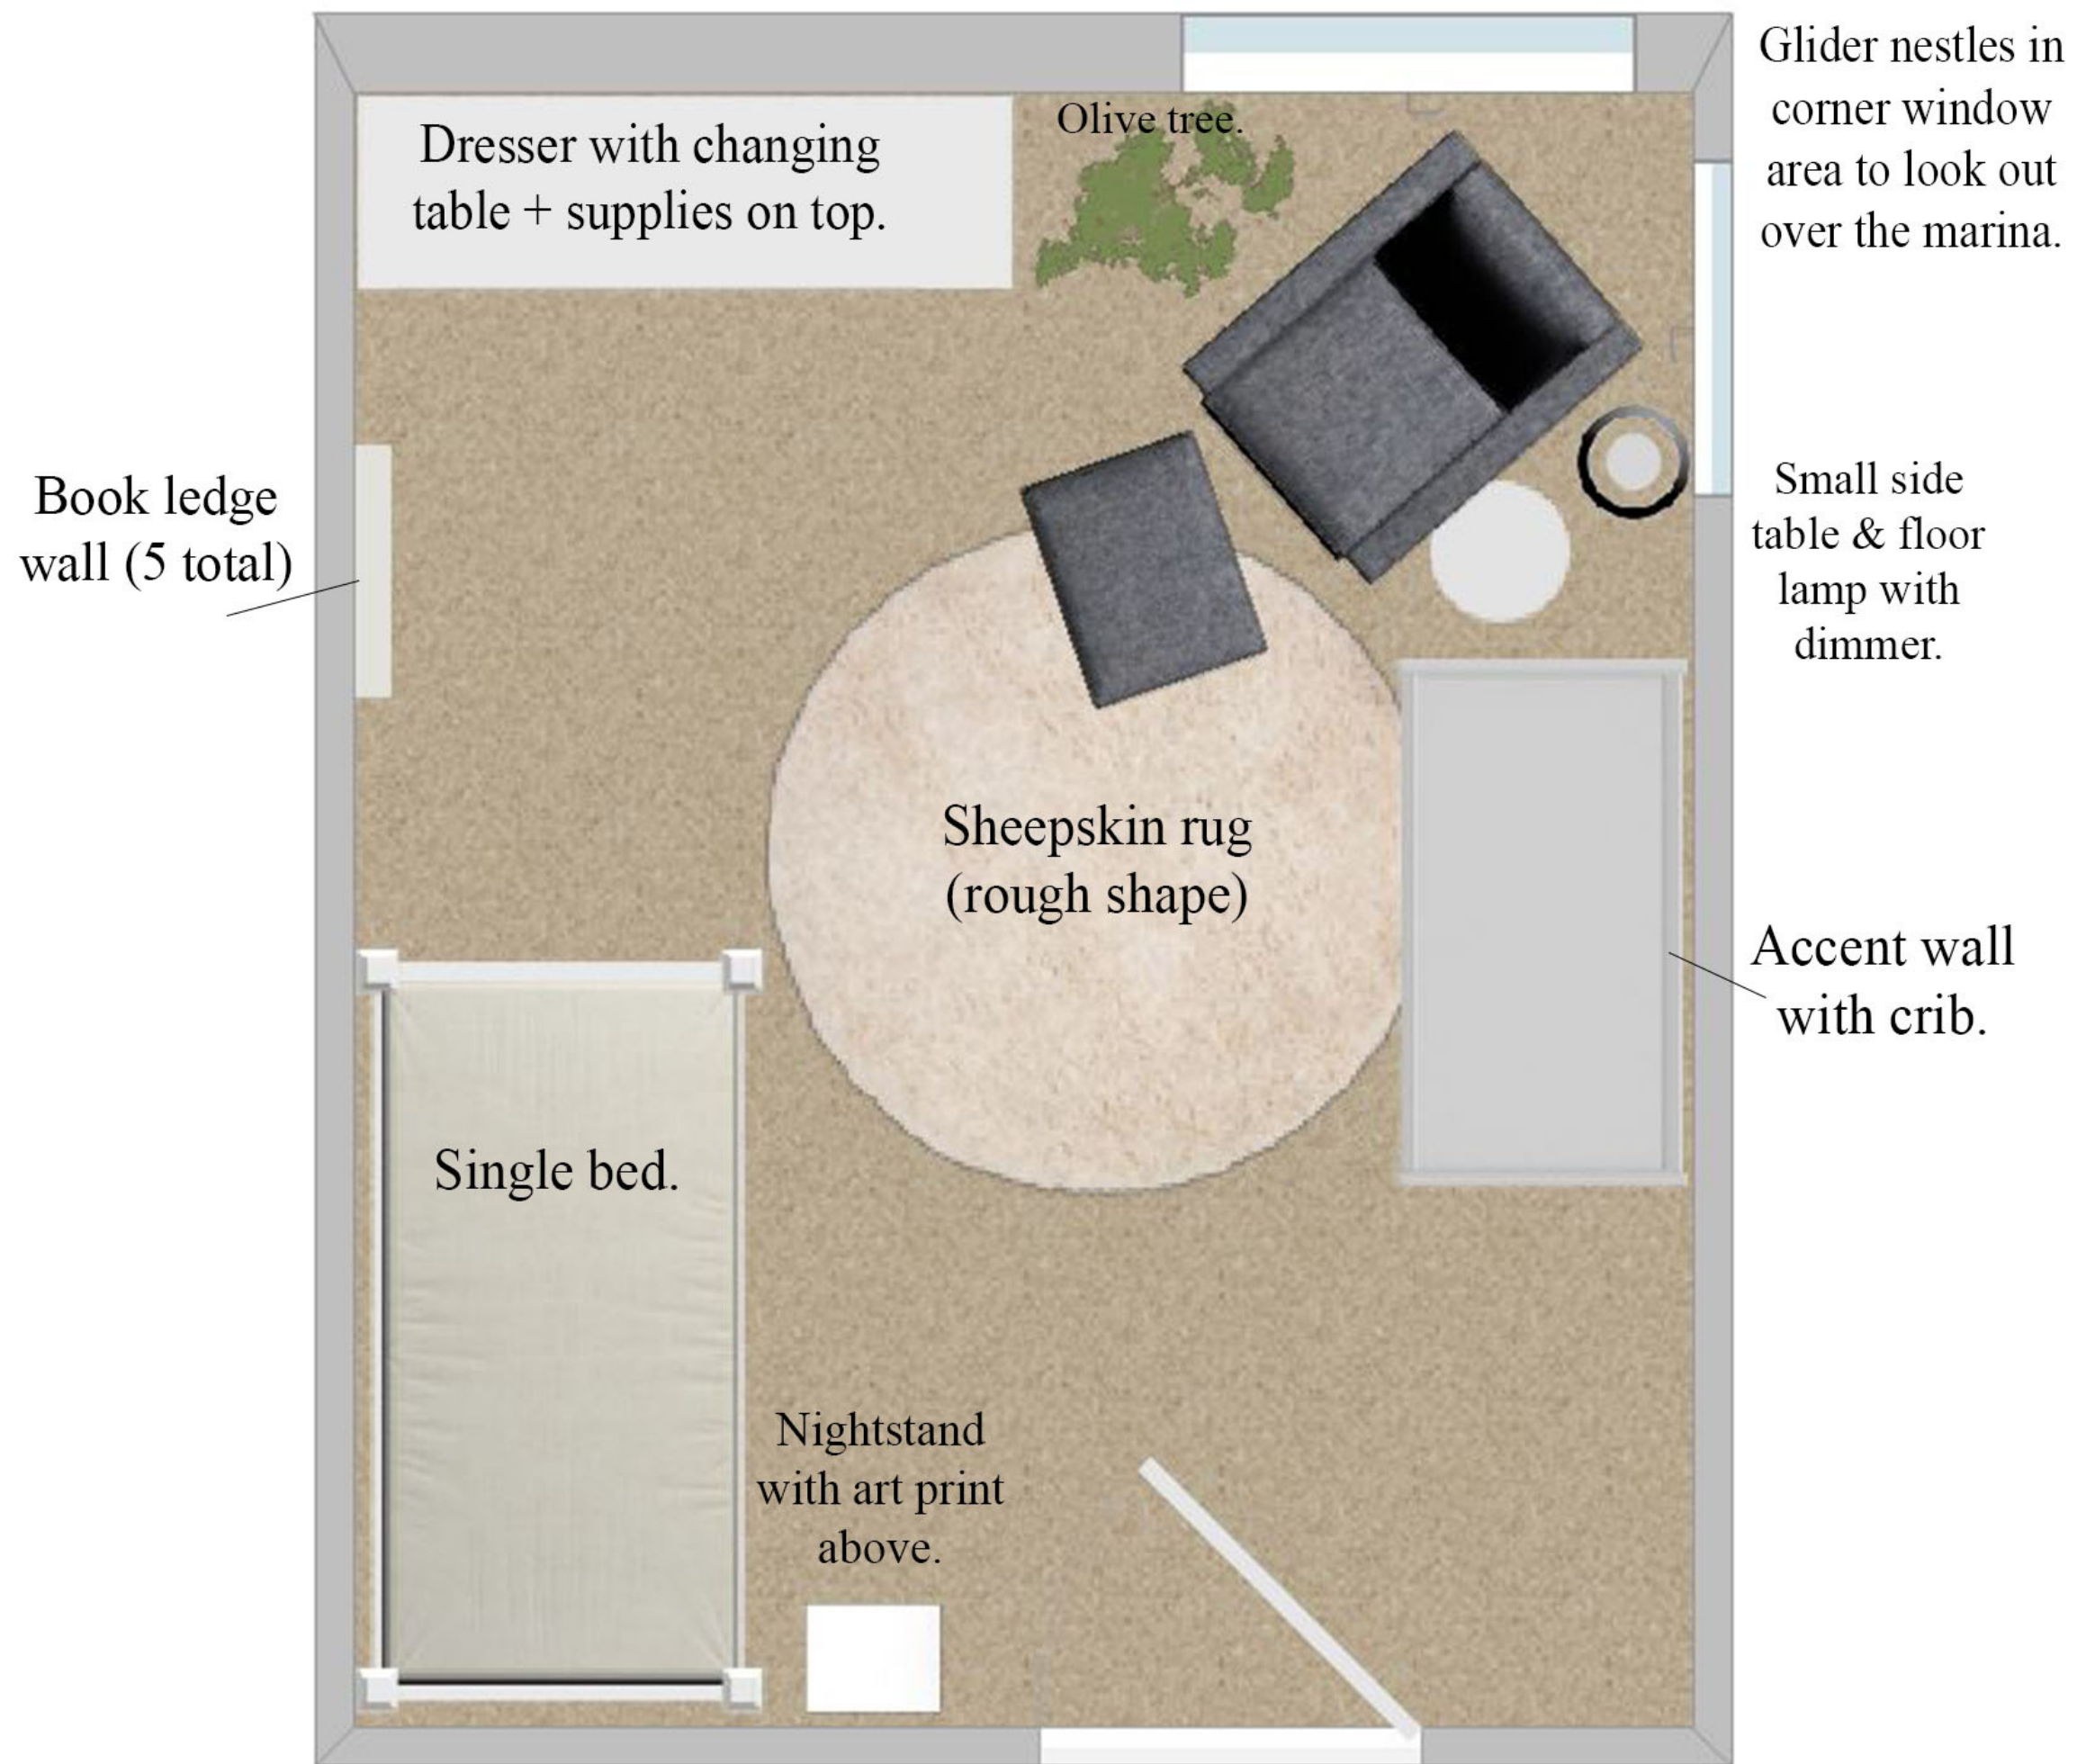

Including a double bed was a recommendation from multiple mothers - both as a place for my client to snooze after late-night feedings, and as a future bed for baby. Again, utilizing various patterns and textures within the neutral color palette gave visual interest to the space. The giraffe art print was a favorite of the father-to-be.

Brass accents are found throughout the room and tie each "zone" together. Seen here in the frame, the table lamp, and the hardware, it was a lovely way to make the room feel upscale. Storage bins, adorned with adorably youthful pom-poms, are perfect for toys and stuffed animals.

DIY Projects:  
Pillow styling & layering

\*Furniture & room drawn to scale\*

We utilized the top of the dresser as the changing table, *freeing up ample floor space* for playtime.
