Design your dream life on a dime

JAIRAM DINING ROOM MOODBOARD

Leaning into the client's vision of "midnight in the tropics", I sourced a bold wallpaper as the focal point, and used it to inform the rest of the colors of the room. Bold, luxurious, and old-world-inspired are words I'd use to describe the space. Certainly an example of upgrading a standard, white-box apartment using renter-friendly design.

I installed the slat-wall on the half-wall going into the kitchen as a point of visual interest and texture. Behr Conifer Green ties it into the colors of the the wallpaper pattern.

Slat Wall Installation

Wallpaper Installation

A vintage frame gallery wall gave the space a “found-objects” feel, leaning into the desired old-world aesthetic.
